## Office Action Summary

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

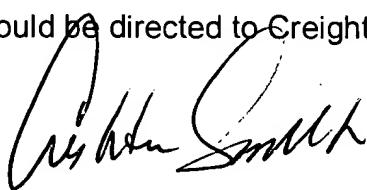

There is no antecedent basis in claim 11 for "said semiconductive circuit"; in claim 2 for "said control electrode"; in claim 10 for "said circuit" and "the impedance."

Claims 1 & 10 are would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. The prior art fails to show applicant's 1st and 2nd gain control signals, whereby the 1st gain control signal is used to adjust the gain and then using that gain adjustment to change the impedance of the circuit. No obvious combination of references found would have taught a person having ordinary skill in the art to make and use applicant's apparatus as claimed.

Claims 2-9 and 11 are would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication should be directed to Creighton h Smith at telephone number 308-2488.
